PROFESSIONAL SUMMARY

Motivated AI & Data Science graduate with knowledge of Python, SQL, Power BI, AWS, Linux, networking fundamentals, and operating systems. Currently developing skills in Cloud and DevOps technologies to strengthen my technical expertise. Strong analytical, problem-solving, and communication skills with a passion for continuous learning and professional growth.

EDUCATION

B.Tech – Artificial Intelligence and Data Science *2026*

PSR Engineering College, Sivakasi CGPA: 7.5

Diploma in Mechanical Engineering *2022*

P.A.C. Ramasamy Raja Polytechnic College | 79%

10th Grade *2019*

Srivi Lions Matric. Hr. Sec School | 62.8%

INTERNSHIP EXPERIENCE

Frontend Developer Intern | Xlorit *Dec 2025 – May 2026*

- Developed and maintained responsive web pages using HTML, CSS, Tailwind CSS, and Next.js.
- Collaborated with designers to implement UI/UX designs, improving overall user experience.
- Optimized frontend components for performance, accessibility, and cross-browser compatibility.
- Participated in code reviews and followed agile development best practices in a team environment.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Frontend: HTML, CSS, Tailwind CSS, React.js, Next.js
Cloud: AWS Services
Networking: Networking Fundamentals, Subnetting
Operating Systems: Linux
Tools & Technologies: Power BI, Git, GitHub, VS Code
Soft Skills: Communication, Problem-Solving, Team Collaboration

PROJECTS

E-Learning Website

- Built a fully responsive e-learning platform using JavaScript, Next.js, and Tailwind CSS focused on delivering an engaging online learning experience.
- Implemented course listing pages, module navigation, and interactive UI components to enhance learner engagement and usability.
- Designed a clean, mobile-friendly interface using Tailwind CSS ensuring seamless access across all screen sizes and devices.
- Utilized Next.js server-side rendering (SSR) for fast page loads and improved SEO performance across all course pages.
- Structured reusable components and maintained a modular codebase to ensure scalability and ease of future development.

Skin Lesion Classification Using Fuzzy Logic

- Designed a fuzzy logic-based machine learning model for accurate classification of skin lesions from medical images, supporting early diagnosis.
- Applied fuzzy inference systems to handle uncertain and imprecise medical data, improving prediction reliability over traditional classifiers.
- Preprocessed and augmented image datasets to improve model generalization and reduce overfitting during training.
- Evaluated model performance using accuracy, precision, and recall metrics, demonstrating significant improvement over baseline methods.

Face Emotion Detection System

- Built a real-time facial emotion recognition system using DeepFace and OpenCV capable of detecting multiple emotions from a live webcam.
- Achieved high accuracy in detecting emotions including happiness, sadness, anger, surprise, fear, disgust, and neutral states.
- Integrated a real-time video processing pipeline enabling smooth live detection with minimal latency and frame drop.
- Designed an intuitive overlay display showing detected emotion labels directly on the live video feed for easy interpretation.

ACHIEVEMENTS & ACTIVITIES

- Participated in Hack Horizons Hackathon – SRM Institute of Science & Technology.
- Participated in Smart India Hackathon (SIH) – national-level government innovation challenge.
- Participated in Technical Symposium – Sri Krishna College of Engineering & Technology.
